SUMMARY

Lead DevOps Engineer with 5+ years of hands-on experience designing, automating, and operating cloud-native infrastructure across AWS, GCP, and Azure. Strong expertise in Kubernetes, GitOps, CI/CD, Infrastructure as Code, observability, and incident management. Proven track record leading engineering initiatives, mentoring teams, improving deployment reliability, and reducing operational risk in production environments.

CORE SKILLS

- **Containers & Orchestration:** Kubernetes, Docker, Helm, Kustomize.
- **Cloud Platforms:** AWS, GCP, Azure, Linode, DigitalOcean.
- **Infrastructure as Code:** Terraform, Crossplane.
- **CI/CD & GitOps:** ArgoCD, GitHub Actions, Jenkins
- **Programming:** Python (Django, FastAPI, Flask), Node.js, Celery, RESTful API design, GoLang.
- **Monitoring and Observability:** Prometheus, Grafana, Tempo, Loki, Mimir.
- **Blockchain:** Solidity, Smart Contracts, EVM.
- **Security:** Kubernetes Security, Cluster Hardening, RBAC, Secrets Management, System Security.

CERTIFICATIONS

- **ISC2 Certified in Cybersecurity (CC)**
- **Certified Kubernetes Administrator (CKA)**
- **Certified Kubernetes Application Developer (CKAD)**
- **Certified Ethereum Developer**

PROFESSIONAL EXPERIENCE

Lead DevOps Engineer Nahmii AS | Remote, Norway

Apr, 2022 - present

Nahmii is a Norway-based technology company that develops a modular, EVM-equivalent layer-2 scaling solution for Ethereum, designed to deliver lightning-fast transactions, instant finality, and predictable fees for commercial-scale decentralized applications.

Contributions:

- Led DevOps initiatives and mentored engineers across Kubernetes, CI/CD, and observability.
- Built GitOps-driven CI/CD pipelines with ArgoCD, reducing deployment errors and enabling fully automated releases across multiple Kubernetes environments.
- Administered and scaled production Kubernetes clusters across AWS EKS and Azure AKS, serving customer-facing workloads.
- Automated infrastructure provisioning using Terraform and Crossplane, with a focus on reliability and cost efficiency.
- Implemented Loki, Grafana, Tempo, Mimir (LGTM) observability stacks, reducing MTTR by 20% and improving production reliability for multiple customer-facing services.
- Led incident response, recovery drills, and post-incident reviews.

Blockchain Developer (Internship) Web3Bridge | Nigeria

Jan, 2022 - Apr, 2022

Learnt blockchain development by creating secure and efficient smart contracts and fostering knowledge sharing within the team.

Contributions:

- Designed and developed smart contracts using Solidity and Vyper, enhancing the security and efficiency of blockchain transactions.
- Established CI/CD environments for frontend and smart contract workloads, streamlining the development process.
- Hosted engaging Knowledge Sharing Sessions on blockchain and software development topics.

Freelance DevOps/Software Engineer Remote

Apr, 2021 - Apr, 2022

Provided end-to-end solutions through collaborative development and streamlined continuous integration.

Contributions:

- Delivered cloud-native backend and DevOps solutions for startups.
- Built CI/CD pipelines for diverse workloads, including Django, Node, React, and FastAPI applications.
- Deployed containerized workloads to Kubernetes on AWS and GCP.

DevOps/Python Developer (Contract)
XOKO | Remote, Italy

Feb, 2021 - Apr, 2021

Delivered a seamless global hostels comparison system through expert Python development.

Contributions:

- Developed APIs enhancing the functionality of a global hostels comparison system.
- Deployed services to a self-managed cluster using containers and Kubernetes for optimal scalability.

Software Engineer
HumberOne (Humber International Limited) | Nigeria

Feb, 2020 - Mar, 2021

Drove innovation and reliability in various lottery systems through robust software development and cloud engineering.

Contributions:

- Built and maintained backend services for high-traffic lottery platforms.
- Supported cloud infrastructure, deployments, and operational reliability.
- Assisted with incident troubleshooting and production debugging.

Software Developer
The Urban Hive Ltd | Nigeria

Sep, 2019 - Feb, 2020

Elevated web applications through Backend/API development, project coordination, and cloud server management.

Contributions:

- Developed web applications, delivering seamless user experiences.
- Coordinated projects and optimized resource utilization through effective cloud server management.

Python Developer (AI/ML) Internship
Bincom | Nigeria

Feb, 2019 - Sep, 2019

Harnessed AI/ML for efficient data acquisition, sentiment analysis, and user identity verification.

Contributions:

- Developed OCR/OMR systems and sentiment analysis models, contributing to data-driven decision-making.
- Automated user identity verification processes, enhancing security and efficiency.

EDUCATION

BSc. CyberSecurity (In Progress)

Miva Open University, Nigeria - Expected 2026

BSc. Biochemistry

Adekunle Ajasin University, Akungba - 2019
